

## How to Insert Your Strapz

This pack includes 4 different lengths of Strapz.

1. Position the Strapz over your current laced shoe to determine which lengths and order of Strapz to use.
2. Once you have completed step 1, remove your old laces.
3. Start at the eyelet holes closest to the toe. Notice the T shape end of the Strapz has one side slightly longer than the other. Insert the longer side in the eyelet and pull through.

4. Do the same thing on the opposite eyelet.
5. Continue to insert the Strapz up the shoe.

Use a small tool like tweezers to help you pull the tip through, if you have shoes with small eyelets. Be careful not to tear the Strapz.

Get creative! Mix up it up by crisscrossing your Strapz!
